POLYMUTAN HOT & COLD WATER PIPING SYSTEMS

Discovery Primea Hotel, Makati City

Executor: Othmann Philippinen

Pipe-material: 99.000 meter of POLYMUTAN pipe

Floors: 68

Building-time: 2013 - 2014

The Discovery Primea Hotel in Makati City, Philippines, is one of the most modern hotels all over the world. Due to this fact, POLYMELT with its high quality pipe POLYMUTAN, is the ideal solution for this project.

POLYMUTAN

HOT & COLD WATER PIPING SYSTEMS

USE ANYWHERE IN NEW BUILDINGS, RENOVATION AND REPAIR PROJECTS

Never stuck for a solution. High product quality. Complete product assortment. Straightforward but extremely reliable and durable watertight joining technology. Low weight and troublefree. Time- and money-saving installation needing only a few light- weight tools. These are all things that make POLYMUTAN a "use-anywhere" indoor hot & cold water piping system. Whether you're building from scratch, renovating or just doing a repair job – the flexibility of POLYMUTAN is one of many "water-tight" arguments in this system's favour.

THE ADVANTAGES OF POLYMUTAN

- High durability thanks to high-quality materials and processing.
- Watertight joins ensure high operational reliability.
- Meets the high hygienic requirements, thus ensuring pristine water quality.
- High abrasion resistance means immaculate hygiene and safety.
- Resistance to thermal stressing, meaning high operational reliability.
- Good chemical resistance ensures long service life.
- Smooth inner surfaces of pipes prevent deposits and incrustation.
- Water-flow noises are minimised and so is the resultant acoustic nuisance in the home.
- The system's high dimensional accuracy and low weight save time and money when it is being installed.
- The extensive range of different pipes and fittings permits solutions for all areas of application.
