

ECOSAN

DRINKING WATER INSTALLATION SYSTEM

Al Habtoor City Hotel, Dubai

Product: 40,000 m ECOSAN ML5 and ECOSAN fittings

Construction period: 2012–2018

Volume: approx. 12 × 40' container

Habtoor Group built the largest integrated hotel complex in the Middle East, comprising a five-level podium, one 36-storey tower and one 25-storey tower within a total GFA of 350,000 m². The landmark development includes 1,600 hotel rooms, spread across three hotels (lifestyle, luxury and main). Al Habtoor City is a multi-use development in Dubai, consisting of three hotels and three high-rise residential towers commissioned by the Al Habtoor Group in 2016.

POLO-ECOSAN

DRINKING WATER INSTALLATION SYSTEM

A SAFE AND RELIABLE CHOICE FOR DRINKING WATER SYSTEMS

The reliable, safe and corrosion-free transportation of water has been a core POLYMELT competence for over 30 years. The high-quality product line ECOSAN encompassing a broad portfolio of pipes and fittings covers all types of applications relevant to building installation, from the main pipe to the last tapping point and is regarded as synonymous with quality and innovation in more than 20 countries across the globe. Thus, POLYMELT offers its customers perfectly coordinated solutions from a single source.

ADVANTAGES OF ECOSAN

- Outstanding long-term resistance
- Corrosion-free
- Safe and homogeneous connections
- Simple and fast assembly
- Excellent chemical resistance
- Superior heat- and sound-insulating properties
- Suitable for very strict hygiene requirements
